airtel

SYNC

Dukaan Connect

From 17.6 days to one sitting

Dukaan Connect sells, verifies and installs small-business bundles on a phone, in the owner's own language.

Working prototype: 10 languages, 33 of 33 advisor scenarios, 12 of 12 KYC specimens, DPDP controls in code

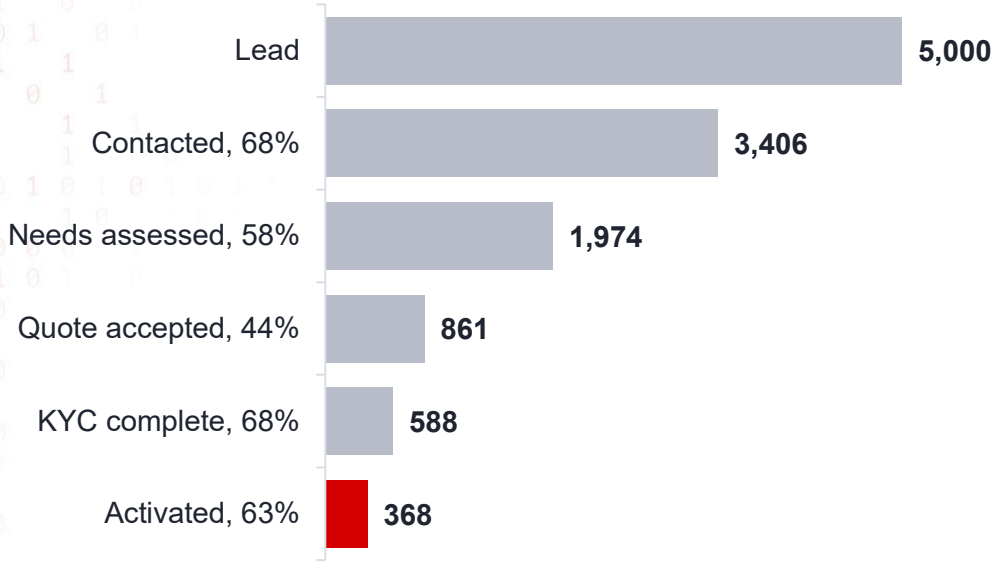

Track A: Project Udyam Digital. Alabhya, IIIT-Delhi

Platform Partner unstop

7 in 100 leads become customers, after 17.6 days

Most leads leave before a quote; the ones who stay wait almost three weeks and chase us three times

17.6 days

from lead to activation, on average

Contact, assess, quote, KYC: 12.9 days before installation (4.8) begins

3.0

chase calls per customer

Rs 15,053

acquisition cost per activation

Leads reaching each stage; % is the share of the previous stage

Source: smb_leads.csv, official synthetic pack, 5,000 leads, April to June 2026. Days are averages for the 368 activated customers.

Two-thirds of lost leads are lost to the process

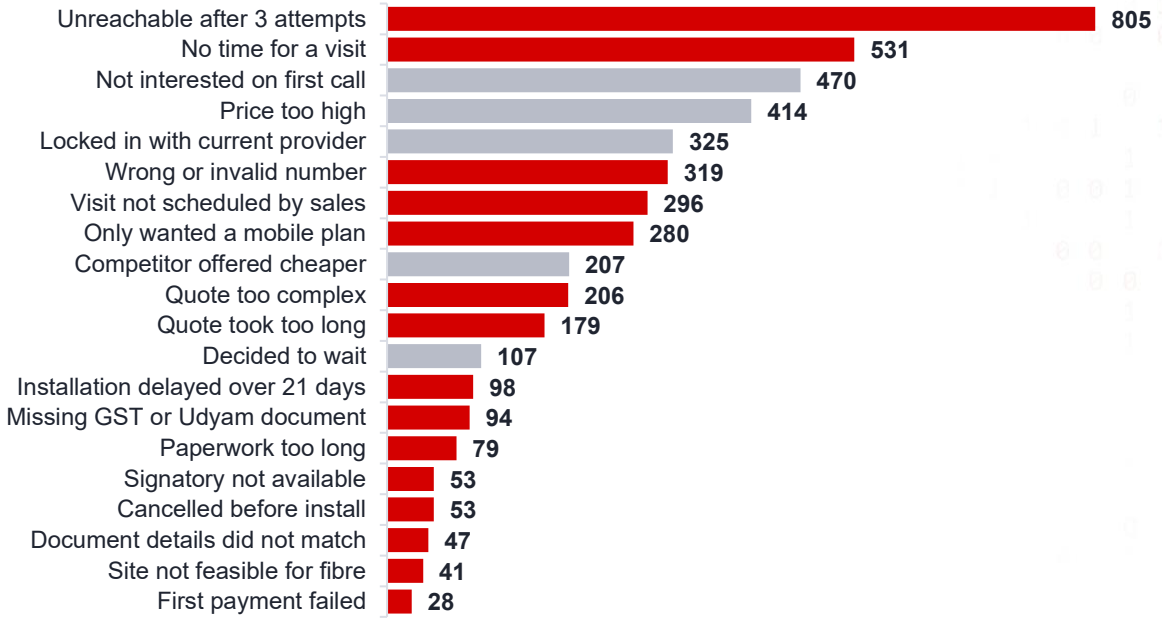

Every red bar is a step our journey removes; only the grey ones are about price, rivals or timing

67%

of drops (3,109 of 4,632) have a process cause a digital journey can fix

- Process: we remove it
- Market: price, rivals, timing

The top three need a salesperson to reach the owner. The journey needs neither a call nor a visit.

Source: smb_leads.csv, official synthetic pack, 5,000 leads, April to June 2026. Drop reasons of the 4,632 leads that did not activate.

Start where digital pays back fastest

Offices and micro retail first; multi-site and factories follow on an assisted path

Segment	Leads	Activation	Avg bundle	Cost to acquire	Payback	6-mo churn	Launch
Micro retail and services	54%	4.1%	Rs 2,505	Rs 20,007	**8.0 months**	22.7%	Wave 1, via WhatsApp
Professional offices	25%	11.1%	Rs 6,796	Rs 10,695	1.6 months	13.8%	Wave 1, self-serve
Small multi-site	15%	11.0%	Rs 31,233	Rs 15,614	0.5 months	10.8%	Wave 2, assisted
Small manufacturers	6%	12.8%	Rs 19,980	Rs 15,324	0.8 months	8.1%	Wave 2, assisted

Dukaan Starter

Kirana, 3 staff

Rs 2,196 a month

Biz Fibre 100, 2 postpaid lines, Cloud POS. Add guest Wi-Fi, CCTV, website

Setup Rs 2,500 over 12 months

Clinic and Office Pro

Clinic, 5 staff

Rs 4,618 a month

Biz Fibre 300, 3 postpaid lines, 5 email seats, 1 TB backup, endpoint security

No setup fee

Multi-site One

4 stores, 15 staff

Rs 23,779 a month

Per store: Biz Fibre 300, failover, SD-WAN, POS. Plus CCTV and 4 lines

Setup Rs 45,000

Factory Connect

Factory, 25 staff

Rs 18,198 a month

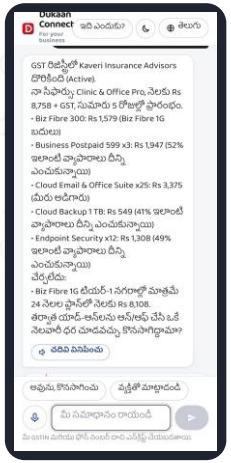

Leased Line 20, managed firewall, 10 machine IoT kits, 25 email seats

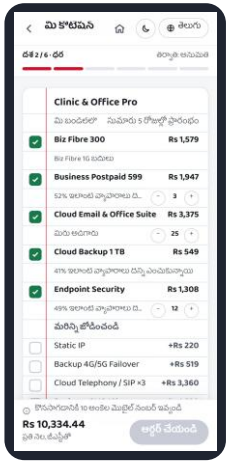

Setup Rs 44,000

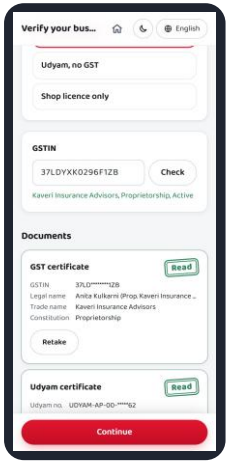

Segments: smb_leads.csv (synthetic). Bundles: our rules engine on product_catalogue.csv, 24-month price, before 18% GST.

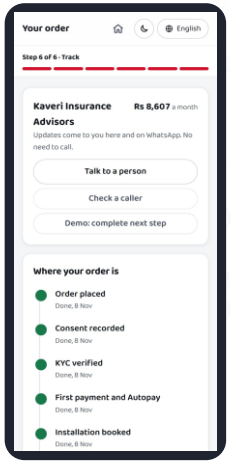

One sitting on a phone, in the owner's language

About 12 minutes from first message to booked install, consent and UPI included

1 Advisor, 4 min

Chat or voice in 10 languages; the GSTIN fills in the business.

Removes: no time for a visit (531), visit not scheduled (296)

2 Quote, 2 min

One monthly price; add-ons tick on and off; 12 or 24 months.

Removes: quote too slow (179) or too complex (206)

3 Smart KYC, 4 min

Registry first, then four photos read on our servers.

Removes: paperwork too long (79), missing documents (94)

4 Tracker, until live

Every product dated; updates on WhatsApp, no calls.

Chased 5 times: 27.9% churn. Once: 5.9%

Screens: the working prototype, specimen applicant K09 (Kaveri Insurance Advisors, Visakhapatnam). Drop counts: smb_leads.csv.

An advisor that cannot mis-sell

The language model talks and explains; a rules engine picks every product and price

Owner — "Insurance agency in Vizag, 25 staff, we need email", typed or spoken in Telugu

↓

Language model — Understands, asks what is missing, explains. Sees masked text only

↓ calls as tools

Rules engine — Catalogue graph: eligibility, dependencies, quantities, price. Names the rule behind every exclusion

↓

Guard — Every product and rupee in the reply must match the engine, or the engine's own wording is sent

56 of 368

customers last quarter (15%) bought a product the catalogue forbids for them

Biz Fibre 1G in tier-2 cities: 24
GST-only products without an active GSTIN: 22
Static IP without fibre: 9
Below the minimum headcount: 8

33 of 33

judge-style scenarios pass, tampered carts included. Zero eligibility violations, with or without an LLM

Mis-selling: activated customers in smb_leads.csv against catalogue rules. Scenarios: /api/judge/scenarios.

KYC in minutes, private by design

Registries first, photos only corroborate; every problem comes with a fix the owner can do

1. **Registry lookup**
   GSTIN and Udyam status: Active, Cancelled or Suspended
2. **Photo quality gate**
   Blur and tilt; tilted photos are straightened
3. **OCR on our servers**
   GSTIN checksum repairs misreads, never a digit
4. **Cross-document checks**
   Legal name, address, bill from the last 90 days
5. **Signatory check**
   SIM swap in the last 72 hours, then a decision

12 of 12 specimen applicants correct

	Flagged	Passed
Planted defect	6	0
Clean	0	6

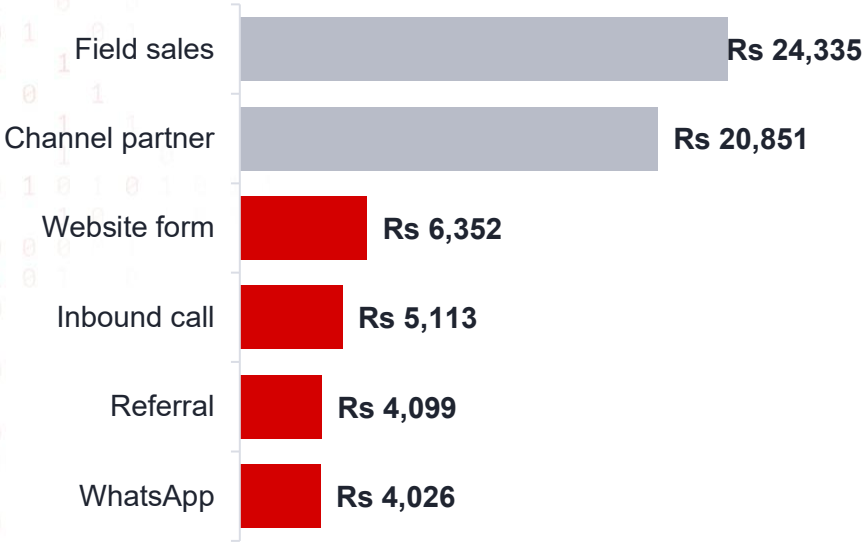

Caught: cancelled GSTIN (K01), blurred photo (K04), missing Udyam (K05), tampered GSTIN (K06), name mismatch (K07), 257-day-old bill (K11). Last quarter, 22 activated customers held a cancelled or suspended GSTIN.

Consent per purpose · **Tokens, not raw IDs** · **AES-256-GCM per record** · **30-day photo shredding**

Specimens: the 12 applicants in kyc_documents/ through the prototype's OCR. GSTIN status: smb_leads.csv.

Partners earn more from digital, not less

Digital activations cost a fifth as much; partners keep their commission

Cost per activation by lead source. Blended: Rs 15,053

Assist mode

Partners run the same app for a customer under their partner code. A digital close in their pin codes earns the same commission.

Callback queue

Stalled leads ranked by propensity (AUC 0.71) with the reason each stopped: 1,293 dropped leads in the top 30%. Calls go through a masked number.

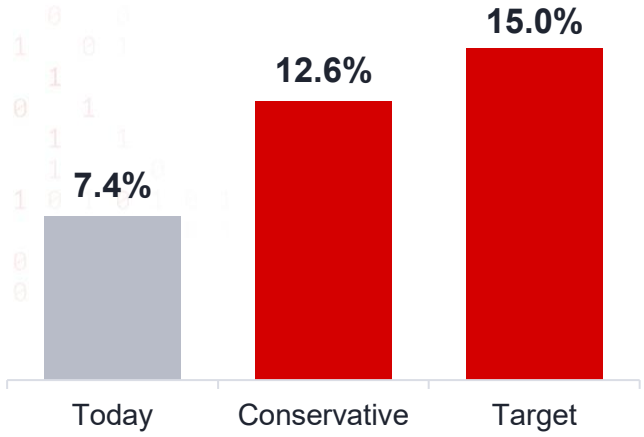

Field sales where it pays

Multi-site and manufacturers, at Rs 20,000 to 31,000 a month, plus the exceptions: failed KYC, site surveys, installation.

Cost: acquisition_cost_inr by lead source over activations, smb_leads.csv. Score: logistic regression, 5-fold CV.

Twice the conversion at a quarter of the cost

Conservative case 12.6%, target 15%: from fixing the process causes behind two-thirds of drops

Lead-to-activation conversion

+264
activations a quarter

Rs 3.9 crore
first-year contract value

Success metric	Baseline	6-month target
Lead-to-activation conversion	7.4%	**15%**
Days from lead to activation	17.6	**7 or fewer**
Cost per activation	Rs 15,053	**under Rs 4,000**
Status-chase calls per customer	3.0	**0.5 or fewer**
6-month churn	15.2%	**10% or less**
Guardrail: eligibility violations	15.2%	**0**
Guardrail: genuine applicants rejected at KYC	n/a	**under 2%**

Model: recovery share per drop reason through later stages, at 60% for the conservative case; Rs 400 a digital lead.

Pilot in 4 cities for 3 months, then scale

Measured against a control group, with the five metrics and two guardrails as the scorecard

Months 0 to 3

Pilot: Delhi, Mumbai, Vadodara, Kochi. Leads split against a control group

Months 3 to 6

All tier-1 cities, 10 languages, WhatsApp at scale, partner assist live

Months 6 to 12

Assisted path for multi-site and manufacturers; tier-2 cities

AI misquotes

Prices come only from the rules engine; a guard checks every rupee

KYC fraud

Registry status, checksum, SIM swap, cross-document match, human review

Partner conflict

Same commission on digital closes in a partner's pin codes

Installation capacity

Slot booking at checkout; AirFiber where fibre is slow

Low digital literacy

Voice, 10 languages, partner assist on the same app

Regulation

DPDP controls built in; DoT KYC rules for business SIMs followed

The ask: a 3-month, 4-city pilot with a control group, run on the prototype that works today

Pilot cities: the two tier-1 and two tier-2 cities with the most leads in smb_leads.csv.
